SECTION 1 OVERVIEW, VISION & STRATEGY

1.0 PLAN OVERVIEW

Fairfax County is renowned for its efficient and well-managed local government, providing responsive services that meet the needs of its residents. As one of the nation's most populous counties in the U.S., Fairfax boasts a robust infrastructure, top-tier schools, a strong commitment to public safety, and a status as a premier technology hub. The Fairfax County Department of Information Technology (DIT) is at the forefront of enhancing government efficiency and fostering innovation, underpinning the delivery of key services, including education, transportation, public health, and emergency management, with cutting-edge technology.

VISION AND STRATEGIC PLANNING

In a landscape marked by rapid change, Fairfax County upholds the principle that continuous technological innovation is not just beneficial but essential. DIT's strategic planning, governance, and program management are pivotal in ensuring the delivery of responsive, secure, and cost-efficient solutions. The county's IT infrastructure is built on an enterprise architecture that incorporates industry standards, cybersecurity measures, and a diverse array of tools and applications, ensuring optimal system performance and data security.

This document outlines DIT's vision, strategy, and governance structure and provides an update on technology projects funded by the annual budget. These projects are integral to achieving the goals set by sponsoring agencies and are closely aligned with the county's broader strategic objectives. The plan also details the funding sources for these projects, including the primary Information Technology Fund and other county resources, emphasizing the priorities that guide budget decisions..

Fairfax County's IT governance framework ensures that technology investments and programs align with the county's strategic business goals. Oversight is provided by the Board's IT Committee, executive committees, and a citizen advisory committee, as well as various governance boards focused on specific initiatives. The document specifies that while it covers IT projects and services, ongoing operational costs and routine maintenance activities are funded separately and detailed in the Fairfax County Fiscal Year 2026 Adopted Budget Plan.

PLAN ORGANIZATION

The IT Plan is organized in five sections:

Section 1: Overview, Vision, and Strategy

Introduces Fairfax County's commitment to leveraging technology for government efficiency and innovation.

Section 2: Information Technology Governance

Describes the governance structures and committees that guide IT investment and strategy in the county.

Section 3: DIT Program Areas

Details the specific areas within DIT that are crucial for supporting the county's technology infrastructure and services.

Section 4: Information Technology Projects

Provides an overview of ongoing and upcoming technology projects, including their funding sources and alignment with strategic goals.

Section 5: Appendices

- ✓ **Appendix A:** Awards
- ✓ **Appendix B:** Acronyms

1.1 THE DEPARTMENT OF INFORMATION TECHNOLOGY ENHANCING COMMUNITY THROUGH TECHNOLOGY

The Department of Information Technology (DIT) stands at the forefront of technological governance, providing essential leadership, architecture, technical resources, and expertise. Its primary role includes the development and deployment of innovative information technologies aimed at enhancing the efficiency and effectiveness of county operations. DIT is instrumental in establishing robust technology architecture and implementing comprehensive systems, applications, and communications alongside the overall management of the county's valuable information assets.

CORE RESPONSIBILITIES

DIT bears the critical responsibility for ensuring the security and safety of county information systems, networks, and data. It mandates that all agencies adhere to stringent IT policies and standards, necessitating a coordinated effort with DIT to meet their IT requirements. This collaborative approach ensures a unified technology strategy across the county's operational spectrum.

MISSION AND VISION

Mission: DIT will provide information technology leadership, products, and services for the Fairfax County government and County citizens. We are committed to supporting government priorities and initiatives, reducing risk, improving governmental operations, and driving transformation through innovation and digital equity while ensuring the security and integrity of government resources and data.

Vision: DIT is committed to delivering world-class information technology services to support the mission of the Fairfax County Government to enhance public service, foster innovation, and ensure equitable access to information and services for the Fairfax County community.

Section 1.2 and 1.3 provide details on DIT's strategy and how it enables the Countywide Strategic Plan.

INTRODUCTION TO DIT'S STRATEGIC APPROACH

DIT is committed to remaining nimble in the face of an evolving technology landscape while ensuring focus on the County's priorities as outlined in the Strategic Plan. To maintain this alignment, DIT conducts frequent and proactive reviews of its priorities and needs, as well as those of partner agencies and the County, ensuring the backlog remains current and accurately reflects the highest-priority work.

REVIEW AND REALIGNMENT

Every quarter, DIT gathers feedback from partners to ensure alignment on strategic and tactical efforts. This ongoing evaluation process is crucial for ensuring that DIT's efforts are consistently harmonized with:

- ✓ The Countywide Strategic Plan, reinforcing DIT's role in supporting the county's overarching goals.
- ✓ The rapid advancements in technology, particularly the utilization of Artificial Intelligence (AI) and Machine Learning (ML), and Big Data technologies which have become integral in modern IT solutions.
- ✓ The industry's pivot towards a hybrid cloud model, offering best of breed solutions for enhanced scalability, flexibility, and efficiency in IT operations.
- ✓ The need for modernization of agency systems, ensuring that these systems can meet the current and future needs of the county and its residents.

STAKEHOLDER ENGAGEMENT AND COMMUNICATION

A key component of DIT's strategic execution is the establishment of frequent touchpoints with the strategy team and all key stakeholders throughout the year. These interactions are vital for:

- ✓ Ensuring a robust Change Management process to provide all parties with information about any changes or updates to strategic IT initiatives.
- ✓ Maintaining a unified understanding and approach towards the implementation of the Countywide Strategic Plan.
- ✓ Facilitating collaborative decision-making and strategic adjustments in response to new challenges and opportunities.

IN-DEPTH STRATEGY INSIGHTS

For a detailed exploration of DIT's strategic direction and contributions to the Countywide Strategic Plan, stakeholders are encouraged to refer to Sections 1.2 and 1.3. These sections offer comprehensive insights into DIT's strategy, detailing how it not only supports but also enables the achievement of the county's strategic objectives. Through a forward-thinking, secure, and efficient technological framework, DIT ensures that Fairfax County remains at the forefront of innovation and service excellence.

DIT ORGANIZATION OVERVIEW

The Department of Information Technology (DIT) is a pivotal component of the county's infrastructure, organized into specialized groups of IT discipline subject matter experts. These groups play a critical role in supporting enterprise-wide systems and applications through a secure infrastructure. Below is an organized overview of DIT's divisions, highlighting their key functions and responsibilities.

- **Application Solutions** that support enterprise-wide systems, technical support for ERP system management, the document management platform, Customer Relationship Management (CRM) platform, revenue systems (Tax), human and health services agencies, land development, public works, zoning, public safety/criminal justice, and general County agencies including the libraries, parks, and facilities management. Also included are Web and GIS systems used by all agencies, as well as particular agency-specific business application development and support.
- **E-Gov/Public Access** program provides architectural direction, standards, and strategies for online applications and technology programs, including web, mobile applications, IVR, social media, and systems and information interoperability architecture.
- **Technology Infrastructure Division** (Platform Technology Division and Communications Technology Division) manage servers and storage hardware environments, middleware integration tools, communications, and network platforms, enterprise messaging applications, desktops, and end-user devices, the network-based digital multi-function printing devices (MFD) that support County-wide distributed printing, print-on-demand, electronic transfer of printed information, and the IT Service Desk.
- **Information Security Office (ISO)** monitors, investigates, and performs compliance activities to ensure County IT assets are safeguarded.
- **Project/Portfolio Management Office (PMO)** manages the IT Projects Portfolio, assists with planning and fiscal oversight, and is responsible for providing direction to assure consistency with established fiscal and budgetary requirements and procurement standards. The PMO processes are designed to ensure that projects follow the County's IT standards and

project management requirements as well as the mission and mandates established by the Board of Supervisors and the Senior IT Steering Committee.

- The **Policy, Planning and Administration (PP&A)** division has primary responsibility for Fiscal Services, Human Resources, and Logistics functions, providing IT policy support, compliance oversight, business management expertise, and agency-wide strategic and professional administrative support. PP&A also coordinates the Department's legislative review process and provides support and coordination for the Information Technology Policy Advisory Committee (ITPAC), an expert citizen advisory body appointed by the Board of Supervisors to advise the Board and the County's Chief Information Officer on strategic IT plans, initiatives, and investments. The PP&A division initiates and implements the Department's equity impact plan in support of the County's One Fairfax policy and provides a myriad of other support functions, including the execution of payroll and human resources policies, procurements, and contracts, as well as fiscal management.
- A specialized **Courtroom Technology Office** that coordinates the implementation and support of modern courtroom technologies for the three Fairfax County Courts (Circuit, General District, and Juvenile and Domestic Relations) and serves as the liaison with the State Supreme Court for technical solutions and data interoperability.
- The **Public Safety Branch** oversees programs and initiatives that integrate systems in public safety, law enforcement, and emergency management, focusing on homeland security, regional collaboration, and interoperability. These initiatives and mandates address key areas such as emergency response, disaster preparedness, and public safety.
- The **Archives and Records Management** provide overall electronic records management and policy development for the county.

MESSAGE FROM THE CIO

Matt Harrison Chief Information Officer/Director on “Our Vision - Transforming Fairfax County Through Innovation”

The Department of Information Technology (DIT) is focused on the rapid and disruptive changes occurring in the information technology space and the impact they are having on our ability to deliver world-class technology solutions to the citizens of Fairfax County and the government that serves this community. DIT is focused on narrowing the digital divide, in alignment with the One Fairfax policy, through a strategic approach driven by innovation and a commitment to delivering secure, reliable, and user-centered technology services.

DIT is committed to delivering on the core drivers established in the Fairfax County Strategic Plan: Equity, Community Outcomes, Data Integration, and Inclusive Engagement.

- *Equity: When creating new products or capabilities, DIT is committed to ensuring citizen access through an inclusively designed web presence and mobile app*
- *Community Outcomes: DIT is aligned with the other Agencies to ensure focus on the 10 community outcome areas through the promotion of innovation in the local economy, effective technology resulting in a high level of customer satisfaction, and empowering vulnerable populations by providing technological solutions where they live*
- *Data Integration: Through the adoption of a data platform and by working closely with partner agencies, DIT is committed to using data for business intelligence, gaining efficiencies across the organization, and providing enhanced services for our citizens*
- *Inclusive Engagement: By committing ourselves to providing our community with an exceptional user experience, DIT is committed to providing our entire community with digital access to government services*

DIT is committed to ensuring the continuity of government and the delivery of services by strengthening our Cybersecurity platform and by supporting service delivery through modern tools. Protecting the integrity of our systems and data is fundamental to maintaining public trust. DIT will continue to enhance our Cybersecurity defenses, build resilience in our operations, and ensure that all staff are equipped with the knowledge and tools necessary to help prevent and respond to threats.

Whether it is social services, permitting, or public safety systems, technology must support efficient, timely, and equitable service delivery. DIT is focused on modernizing legacy platforms, reducing downtime, and improving access – especially for frontline staff and residents with the greatest needs.

DIT is focused on fostering collaboration between business stakeholders and technical users to build and deploy solutions that are not only efficient but also responsive to the rapid pace of change in citizen expectations. The essence of our approach is to ensure the seamless integration of business acumen with technological innovation.

Innovation lies at the heart of DIT's mission, particularly in the realm of advanced technologies such as artificial intelligence (AI), machine learning (ML), data mining, business intelligence, and enhancing the user experience. We recognize the transformative

potential of AI, and our priorities include exploring AI for predictive analytics to improve decision-making processes, utilizing natural language processing to enhance citizen interaction with digital services, and deploying intelligent automation to streamline workflows and increase operational efficiency.”

1.2 FAIRFAX COUNTYWIDE STRATEGIC PLAN

The Board of Supervisors adopted the Countywide Strategic Plan in October 2021 (and revised June 2024) to guide and shape the future of our community. It provides County Agencies and Departments with a framework to anticipate challenges and opportunities, and enables the prioritization and resolution of issues that matter to its constituents.

Core to the development of the Countywide Strategic Plan were the emergence of Key Themes representing elements relating to Ten Community Outcome Areas that constitute the issues of greatest importance to the Fairfax County Community.

Key Themes

At the heart of the Countywide Strategic Plan's development were several Key Themes identified as critical to the future success and well-being of Fairfax County. These themes include:

- ✓ **Access:** Ensuring all residents have access to essential services and opportunities.
- ✓ **Innovation:** Promoting a culture of innovation to improve service delivery and community engagement.
- ✓ **Affordability:** Making living in Fairfax County more affordable for all residents.
- ✓ **Collaboration and Engagement:** Fostering a collaborative environment with active community engagement.
- ✓ **Placemaking:** Enhancing the county's physical and cultural spaces to improve the quality of life.
- ✓ **Sustainability:** Committing to sustainable practices to protect the environment for future generations.

These themes represent the foundational elements that guide the Strategic Plan's approach to addressing the following Ten Community Outcome Areas, which encapsulate the issues most important to the Fairfax County Community.

Ten Community Outcome Areas

The Strategic Plan focuses on the following areas, deemed vital for the county's prosperity and residents' quality of life:

1. **Cultural and Recreational Opportunities:** Enhancing access to cultural and recreational activities for all residents.
2. **Economic Opportunity:** Fostering a vibrant economy that provides opportunities for all.
3. **Effective and Efficient Government:** Ensuring government services are delivered efficiently and effectively.

OVERVIEW, VISION & STRATEGY

4. **Empowerment and Support for Residents Facing Vulnerability:** Providing support for the county's most vulnerable populations.
5. **Environment and Energy:** Committing to environmental protection and sustainable energy practices.
6. **Healthy Communities:** Promoting health and wellness across the county.
7. **Housing and Neighborhood Livability:** Improving the affordability and quality of housing and neighborhood conditions.
8. **Lifelong Education and Learning:** Supporting educational opportunities for residents of all ages.
9. **Mobility and Transportation:** Enhancing the county's transportation networks to improve mobility for all residents.
10. **Safety and Security:** Ensuring the safety and security of all residents and visitors.

The Fairfax Countywide Strategic Plan represents a forward-thinking approach to governance, emphasizing the importance of community feedback, strategic planning, and proactive management to navigate the complexities of modern governance and community development.

ACCESS

Fairfax County provides a wide variety of quality programs and services to our community. However, in our geographically large and diverse county, we recognize that many residents face barriers – physical, economic, language, technological and others – that may prevent them from easily accessing these offerings. In addition to proactively addressing these barriers, we must improve the clarity of our messaging and do more to effectively integrate and communicate information about available services so they are easier for the general public to navigate and access.

INNOVATION

As community conditions constantly shift, the county must move beyond the status quo to seek new and innovative ways to serve our residents. This includes embracing new technology (while also recognizing that virtual outreach and service delivery have limitations, especially when serving the most vulnerable members of our community). As part of the strategic planning process, county staff have started to move outside of department silos and the county organization has become increasingly agile and responsive as a result. The county and community will be challenged to continue to learn, constantly integrate new tools and information and make ongoing adjustments to the strategies in the plan and to effectively adapt to changes over time.

COLLABORATION & ENGAGEMENT

The challenges facing Fairfax County, both now and into the future, cannot and will not be solved by government alone. The creativity, energy and diverse thinking of our residents, businesses and community groups will be critical in order to make meaningful progress in the Ten Community Outcome Areas. As the plan moves forward to implementation, the county will improve the way customer input is used to inform and update the plan over time and will seek to leverage existing community connections and communication channels, to ensure a broader and more representative set of perspectives that include people of all races, ages, ethnicities, income and education levels.

DIT ALIGNMENT TO KEY THEMES

While every County Agency or Department will align with one or more Key Themes and Community Outcome Areas, the Department of IT (DIT) provides services primarily related to **Access, Innovation and Collaboration and Engagement**.

DIT ALIGNMENT TO COMMUNITY OUTCOME AREAS

The Department of Information Technology (DIT) is central to enhancing Access, Innovation, and Collaboration within the county, aligning closely with two critical Community Outcome Areas of the Countywide Strategic Plan: 1) **Effective and Efficient Government**, and 2) **Safety and Security**.

Effective and Efficient Government

To be truly effective and efficient, the county needs well-functioning facilities, secure technology that works, reliable infrastructure and an outstanding workforce that is focused on moving beyond department silos to focus on what is best for the county as whole. To succeed well into the future, Fairfax County must constantly reinforce a culture that supports employees to become more data-driven, service oriented, collaborative and adaptable to change. Leadership and staff at all levels must effectively communicate, continuously build on lessons learned, benchmark for best practices and seek new and better ways to serve the community.

DIT underpins a government that operates seamlessly with secure technology, reliable infrastructure, and a dynamic workforce. It champions a culture of data-driven decision-making, service excellence, and cross-departmental collaboration, essential for continuous improvement and innovation.

These proposed strategies were developed based on the extensive background work completed by the Countywide Strategic Planning Teams. A summarized version of the strategies applicable to DIT has been listed below. For the full list of proposed strategies, refer to the [Countywide Strategic Plan](#).

Customer Satisfaction with County Services
Implement a human centered and highly responsive design approach in technology solutions with the goal of achieving improved customer experience. Adopt a comprehensive approach to consistently solicit end user feedback.
Inclusive Community Engagement
Implement frameworks and technology solutions to foster engagement with the citizenry in an inclusive and diverse manner. This would include enhanced outreach and tailored messaging, making available resources needed to engage and participate in community discussions and decisions, and increased levels of Digital Equity to enhance service delivery.
Effective and Representative County
Continuously improve the department's competitiveness by recruiting and retaining a diverse workforce. Streamline processes to onboard and train staff in a broad spectrum of competencies needed to ensure succession planning, continuity of operations, technology proficiency, equity, diversity, collaboration, excellence, innovation, customer service, transparency accountability, and trustworthiness while supporting the all-round growth of our employees.
Financial Sustainability and Trustworthiness
Review and re-engineer DIT practices and procedures to improve performance, reduce cost, and eliminate redundancies. Adopt a strategy that promotes continuous improvement in all facets of day-to-day operations and future planning to ensure fiscal prudence and data-informed decision-making. Inform the community about spending priorities and services provided.
Effective Technology and Quality Facilities
Implement a data governance policy that standardizes and strengthens how the county collects, analyzes, warehouses, and shares data. In addition, implement a technology plan to enable innovative solutions, reduce operational costs, and deliver exceptional outcomes.

Safety and Security

To meet the diverse needs of all residents, Fairfax County must ensure a comprehensive, equitable and inclusive approach to public safety and justice. Building a safe community is more than reducing and preventing injury and crime, it is about investing in strong, vibrant and engaged communities where people are protected and supported to live their lives to their fullest potential.

Residents, employees, and businesses want a community where people can go about their daily lives without fear, or risk of harm. The responsibility to ensure a safe and secure place where all people can thrive is shared across multiple county departments and must also include the full participation of the entire Fairfax County community.

The proposed strategies in this section seek to promote fair policing and prosecution practices, strengthen the relationship between public safety and the most vulnerable members of our community, reduce reliance on use of force and incarceration, expand prevention and preparedness programs, and enhance transparency and infrastructure.

DIT plays a crucial role in maintaining the safety and security of the community by implementing advanced technology and stringent security measures. DIT assists Public Safety and other agencies by providing them with information technology solutions needed to deliver their services in a secure manner. This not only protects against threats but also strengthens public confidence in the government's ability to safeguard their well-being.

Reliable and Secure Critical Infrastructure

- Provide the community with access to technology solutions in a secure manner. Implement a comprehensive initiative to continuously evaluate and analyze risk posture of critical infrastructure and systems in the county, and action plans to enhance protection, resiliency, and identify weaknesses and reduce the risks associated with cyber-attacks.

DIT's strategic alignment with key themes and community outcomes emphasizes its vital role in driving forward county objectives, fostering a more efficient, secure, and collaborative environment for all.

DIT'S CONNECTION TO THE COUNTYWIDE STRATEGIC PLAN

The Countywide Strategic Plan serves to provide guidance and overall strategy to be executed by County agencies and departments, including DIT. The following sections illustrate this alignment, including how the DIT execution strategy closely aligns with both the Countywide Strategic Plan and the One Fairfax policy.

1.3 DIT STRATEGY

STRATEGIC OVERVIEW

The Fairfax County Department of Information Technology (DIT) strategy is created to drive digital transformation, delivering innovative, secure, and efficient technology solutions that enhance community services and internal operations. This strategy aligns with our overarching mission to empower and serve our community through technology. The County's mission, vision and key values guided DIT in developing its strategy and serves to enable key components of the Countywide Strategic Plan.

Moving from **Reactive** to **Proactive** to **Innovative**, addressing Effective and Efficient Government.

DIT GUIDING PRINCIPLES

DIT's strategy is firmly rooted and driven by the following guiding principles:

- ✓ **IT Strategic Alignment:** Provide technical strategies that align with the County's strategic direction and leverage technology to drive better outcomes.
- ✓ **Enterprise Value Focus:** Provide vision, leadership, and a framework to evaluate emerging technologies and implement proven information technology solutions.
- ✓ **Customer Centricity:** Deliver best experiences to our customers through services, products and empowerment.
- ✓ **Innovation:** Embrace innovation to enhance digital experiences and modernization.
- ✓ **Engaged and Resilient Workforce:** Develop and maintain technically skilled staff competent in current and emerging information technologies.

OVERVIEW, VISION & STRATEGY

- ✓ Strategic Collaboration: Collaborate with County agencies to understand their business needs and improve County operations by planning, implementing and managing the best information technology solutions available.
- ✓ Compliant and Secure: Adhere or maintain policy and procedural frameworks, laws, and regulations, to support appropriate security and privacy controls, compliance, and usability of information and technology assets.

THE CORE OF OUR STRATEGY

Central to our strategy is a multifaceted approach that prioritizes robust digital infrastructure, data-driven decision-making, proactive cybersecurity, and the agility offered by cloud computing. This strategy is our roadmap to a future where our community benefits from a government that is more efficient, transparent, and responsive.

DIT STRATEGIC GOALS

Our top DIT Goals and Key initiatives collectively support the county's Strategic Priorities and improve the delivery of DIT products and services. We will regularly measure and report on stakeholder satisfaction with and quality performance of DIT services. Our strategy will help DIT evolve into a trusted business partner leading Fairfax's digital transformation.

DIT Goal	Goal Statement
Digital Transformation	Drive end to end innovation that includes people, policies, processes and technology. It enables development of new capabilities that improve efficiencies through automation. These efficiencies will be achieved in a secure manner with a focus on improving citizen/government services.
Data Management & Business Intelligence	DIT is a data-driven organization that leverages data as an asset for continuous improvement and effective decision making. We will establish a Countywide data stewardship framework that includes standards, governance, privacy, analytics, and open exchange. As the central IT organization, DIT will provide pathways, tools, and expertise to promote data-driven insights and develop evidence-based strategies.
Cyber Security	DIT is dedicated to the protection of its IT assets and the data/information in its charge, as well as ensuring that no unauthorized access or use of such data/information occurs. DIT will continue to maintain a robust and aggressive vulnerability and risk management program to continuously assess and validate the organizations security posture and ensure compliance with Federal, State and industry regulations and best practices.
Cloud Computing	DIT embraces cloud computing based on business requirements for enabling convenient access via, on-going demand networks to a shared pool of configurable computing resources (e.g., networks, servers, storage, applications and services) they can be rapidly provisioned and deployed with minimal management effort or service provider interactions.
Workforce Optimization	DIT is dedicated to acquiring, developing and competitively compensating high-performing human capital resources to sustain and enhance Fairfax County's complex IT environment. This will require enhanced resources and long-term commitment.

DIT STRATEGY AND KEY INITIATIVE PLAN

Our Strategy and Key Initiatives contain projects and initiatives focused on improving our most important core processes and capabilities, aimed at transforming DIT's role in leading the County's digital transformation. These key initiatives collectively support Fairfax County's mission and priorities and improve the delivery of IT service. DIT's strategy is built to continuously Evolve and Adapt to meet dynamic business needs and stay current with modern and emerging technology trends. Its Strategy Refresh Plan includes processes to:

- ✓ Include frequent reviews of the DIT strategy to ensure proactive addressal of changes to Fairfax County's strategy or direction.

- ✓ Conduct dedicated and frequent touch points throughout the year to ensure the strategy team and all stakeholders are on the same page about any changes or updates regarding strategic IT initiatives.

Section 1.4 provides additional views into how DIT strategy informs and advises project selection through execution.

1.4 REALIZING DIT STRATEGIC GOALS THROUGH PROJECT IMPLEMENTATION

DIT has embraced a comprehensive and holistic end-to-end approach of using our strategy to guide its priorities and by extension the careful selection of projects to realize our defined strategic goals. DIT is organized internally by Program Areas (described in detail in Section 3.0), each of which has multiple IT projects grouped under them. In turn, every IT project being executed supports one or more DIT Strategic Goals and aligns with appropriate Key Themes and Community Outcomes as defined in the Countywide Strategic Plan.

DIT realizes the critical role it plays as part of the Fairfax County ecosystem and the reliance on crucial IT services by its constituents. Every IT project, whether Operational or in Implementation, is closely monitored and reported on periodically to stakeholders. Section 4 of this IT Plan describes the various IT projects currently being undertaken and summarizes the past fiscal year's accomplishments, go-lives, modernization efforts, and the impact the project is having on the County's constituents.

ACTIVE IT PROJECTS

The following “meatball” chart provides a birds-eye end-to-end view of all the IT projects and highlights our strategy execution via individual projects and their alignment to DIT Strategic Goals:

- Digital Transformation
- Data Management and BI
- Cybersecurity
- Cloud Computing
- Workforce Compensation

IT Project Number & Name	Description	Digital Transformation	Data Management & BI	Cybersecurity	Cloud Computing	Workforce Optimization
2G70-006-000 IT Training	Support for technical training and travel expenses					■
2G70-015-000 Tactical Initiatives	Addresses urgent technology requirements between budget cycles	■	■	■	■	■
2G70-018-000 Enterprise Architecture and Support	Operations and enhancements to enterprise ERP services		■			
2G70-020-000 Internet/Intranet Initiatives - eGov	Supports multiple E-Gov platforms, and internal/external County websites and enterprise applications	■	■		■	
2G70-021-000 Case Management System (CMS)	Case Management System (CMS) that automates case-processing through the Circuit Court	■				
2G70-022-000 Court Automated Recording System	Project enabling the Clerk of the Fairfax Circuit Court to provide the public with reliable and timely access to records	■				
2G70-034-000 Courtroom Technology Management Systems	Upgrades and modernization of technology platforms at County Courts					■
2G70-036-000 Remote Access	Supports secure enterprise remote access for user access to county networks/systems	■				
2G70-037-000 Child Care Technology	Integrated Eligibility and Benefits for Office for Children (Dep. of NCS)	■	■			
2G70-040-000 Facilities Maintenance Management System	Implementation of an Enterprise Asset Management system for FMD	■				

IT Project Number & Name	Description	Digital Transformation	Data Management & BI	Cybersecurity	Cloud Computing	Workforce Optimization
2G70-041-000 Customer Relationship Management	Maintenance and modernization of County CRM systems	■	■		■	
2G70-052-000 Cybersecurity Enhancements Initiative	Supports for IT security initiatives, enhancements, and systems/applications monitoring			■		
2G70-055-000 Volunteer Management System	Management system for County and agency volunteers					■
2G70-056-000 PSCC Wireless - Radio System Upgrade	Enables silent, efficient dispatch and coordination of public safety through mobile data communication.	■				■
2G70-59-000 Mobile Computer Terminal	Supports critical public safety response through mobile data dispatch, communication, and status tracking.	■				■
2G70-067-000 Electronic Summons and Court Scheduling	E-Summons streamlines traffic stops and automates citation entry into records system.	■				■
2G70-069-000 Tax Modernization Project	Replacement and modernization of County's legacy tax systems	■	■		■	■
3G70-078-000 E 9-1-1 Telephony Platform Replacement	Modernizes 9-1-1 systems for NextGen capabilities, supporting text, video, and VoIP dispatch.	■				■
3G70-079-000 Public Safety CAD System Infrastructure	Upgrades core CAD system infrastructure supporting emergency response for all Fairfax public safety agencies.	■				■
IT-000006 Office of Elections Technology	Supports strategic enhancements to the County's election related technologies and hardware	■				■
IT-000013 Police Records Management Refresh	Replacement of legacy RMS with modern COTS product				■	■
IT-000014 Sheriff's Office Civil Enforcement System	Automation of existing civil enforcement business processes and replacement of legacy systems	■				
IT-000015 Commonwealth Attorney Case Management System	Enhancements to case management system and automation of manual process flows		■			
IT-000016 Budget Solutions	Implements joint FCG-FCPS budget system to streamline planning, reporting, and publication processes.	■	■			
IT-000017 Enterprise Content Services	Implementation of an Enterprise Document Management system for all County agencies	■	■			

IT Project Number & Name	Description	Digital Transformation	Data Management & BI	Cybersecurity	Cloud Computing	Workforce Optimization
IT-000019 Planning and Land Use System (PLUS)	Modernization and consolidation of numerous legacy land use systems	■	■		■	■
IT-000025 Integrated Human Services Technology	Development of an Integrated Multifunctional System for HHS delivering coordinated services	■	■			
IT-000026 Diversion First Interoperability	Initiative offering alternatives to incarceration as part of the criminal justice system	■	■			
IT-000027 Health and Human Services Integrated Electronic Health Records	Implementation of Electronic Health Records system for Health Department	■	■		■	
IT-000028 Geospatial Initiatives	Modernization of County's GIS systems and infrastructure	■	■		■	■
IT-000034 Enterprise Data Analytics and Business Intelligence	One-stop-shop for County program information and data via a central data warehouse		■		■	
IT-000040 Tax Business Process Enhancement	Expansion of CRM solution to support DTA needs and business processes	■			■	
IT-000042 FCPA Asset Information Management System	Implementation of a facilities and asset life cycle management solution for Park Authority assets	■				
IT-000044 HANA FIORI Mobile	Supports migration to HANA SAP database for SAP applications and deployment of Fiori Mobility		■			
IT-000045 Load Runner	Supports LoadRunner implementation to measure system behavior and performance		■			
IT-000047 Sheriff's Office Jail Management System Replacement	Multi-phase replacement of the current legacy Sheriff Inmate Management System	■			■	
IT-000048 Digital Archives	Streamline the acquisition and management of County information assets to support retention and disposal policy needs	■	■			
IT-000050 Domestic/Sexual Violence Client Data Management System	Supports clinical service delivery to individuals and families impacted by domestic violence	■				
IT-000052 HCD Digitization	Project to support Housing and Community Development's (HCD) document digitization efforts	■	■			
IT-000056 Enterprise Modernization	Migration from legacy systems and access databases to standardized modern systems	■	■		■	

IT Project Number & Name	Description	Digital Transformation	Data Management & BI	Cybersecurity	Cloud Computing	Workforce Optimization
IT-000062 CSB EHR Implementation	Implementation of Electronic Health Records system for Community Services Board	■	■		■	
IT-000063 JDRDC Residential Case Management System	Replacement of legacy application to support intake and management services for juveniles	■	■			
IT-000065 DFS Finance Enterprise Content Management System	Development of an electronic document management system for DFS Finance and HR	■	■		■	
IT-000066 SO Electronic Health Records System	Implementation of Electronic Health Records system for Sheriff's Office				■	
IT-000067 Sheriff's Office Records Management System Implementation	Implementation of Records Management System for Sheriff's Office	■	■			
IT-000068 PD Real Time Crime Center System	Data collection and analytics/presentation layer to aggregate data from disparate systems	■	■			
IT-000069 FCPA Security Camera Expansion	Installation of additional cameras and infrastructure to bolster safety and security of County parks	■	■			
IT-000070 DEMS Security Work Order Request System	Implement system for ingesting and managing all County security related requests	■	■			
IT-000071 Courts Digital Evidence Management System	Project to streamline the storage, retrieval, and sharing of digital evidence securely and efficiently	■	■			
IT-000073 Athletic Field Scheduling System <i>NEW!</i>	Project to replace the legacy facility scheduling system.	■			■	
IT-000074 Sheriff's Office Inmate Tracking System <i>NEW!</i>	Electronic system boosts inmate tracking, safety, and efficiency.	■	■
